Childcare costs in Nebraska continue to rise and families are feeling THE SQUEEZE

Across Nebraska Families are feeling the pressue

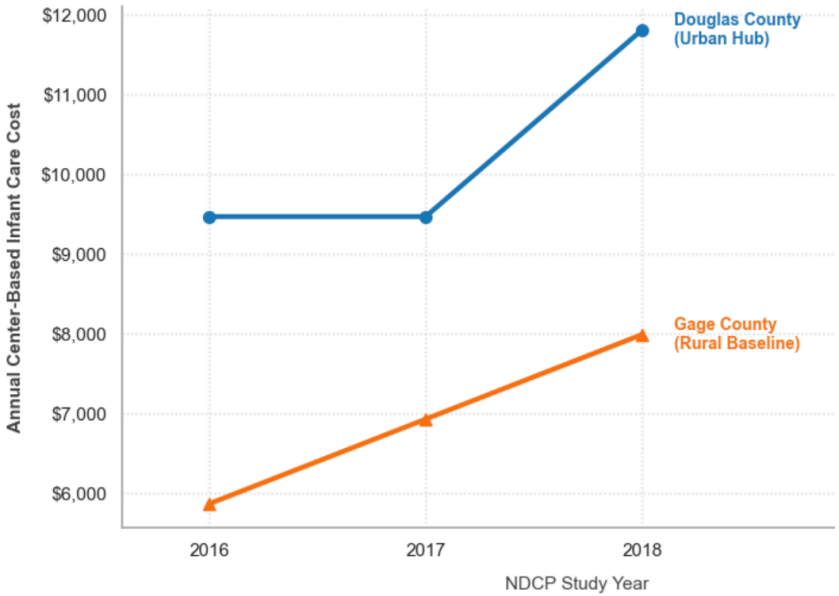

of childcare consuming a high percentage of family income

*The Federal HHS Affordability threshold is capped at 7%. Lower-income rural counties match urban percentages due to compressed wage scales.

Childcare Costs are Continuing to Rise

affecting both rural and urban counties

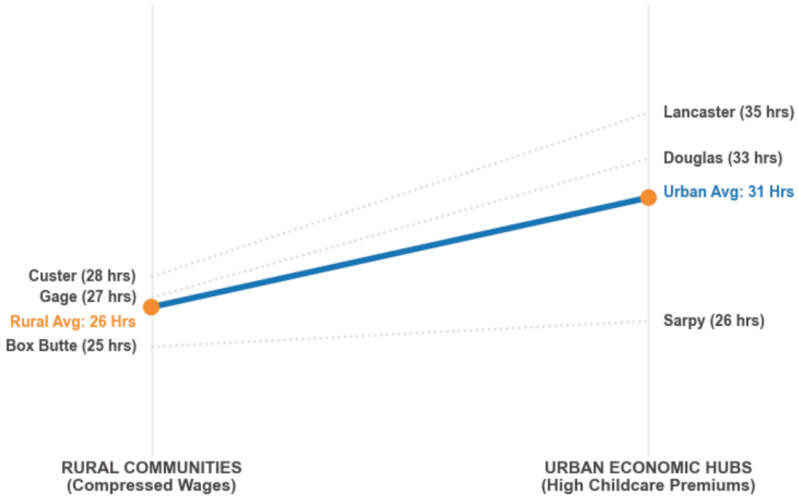

Across Nebraska childcare costs are skyrocketing and costing families much more than the HHS's 7% deemed as "affordable childcare"

This means Nebraska families cannot afford to spend money and stimulate the local economy since so much of their paychecks are going to pay for childcare.

For a Median Paid Nebraska worker

this is how many work hours they must log a month solely to pay for a single center-based infant slot

How the local economy is affected (Douglas County, NE)

with childcare costs consuming a median family budget (Base Income: $61,688/yr)
